Products

Chewing Gum Aluminium Foil

SYMETAL has been a partner to the international confectionery industry for more than 30 years, fully satisfying its customers with regard to its high quality, competitive pricing and very flexible and reliable service.

Our chewing gum alu-foil products are exported to a number of different geographical locations, representing almost 10 % of our total sales volume.

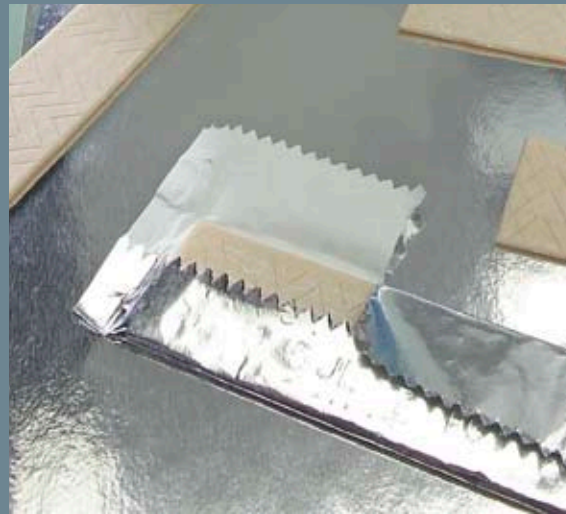

Our chewing gum alu-foil stands out for its excellent machinability and folding properties, as well as its product performance.

Competent and experienced technicians, administrative and sales personnel, support the company's commitment for customer satisfaction.
