

 **SYMETAL**  
ALUMINIUM FOIL INDUSTRY S.A.

Aluminium  
Converter Foil

# Products

## Aluminium Converter Foil

Having made substantial investments over the past years, SYMETAL produces excellent quality Converter Foil coils that ensure continuous material flow during processing.

## Quality Certification

According to EN and AA Standards or other agreed customer specifications.

Each reel is thoroughly measured and tested in order to ensure its quality during the rolling procedure. SYMETAL Converter Foil is thermally degreased, suitable for diverse packaging applications that include:

- Paper Lamination
- Polyethylene Film Lamination
- Wax Lamination/Printing
- Heat-Sealable Lacquering

SYMETAL Converter Foil is provided in both 8xxx and 1xxx aluminium alloy series reels all in soft temper, satisfying end-user needs, such as:

- Cigarette Packaging
- Multi-Laminate Packaging
- Blister Foil
- Yoghurt Lids
- General Insulation Foil.

## Production Range

### Dimension Range

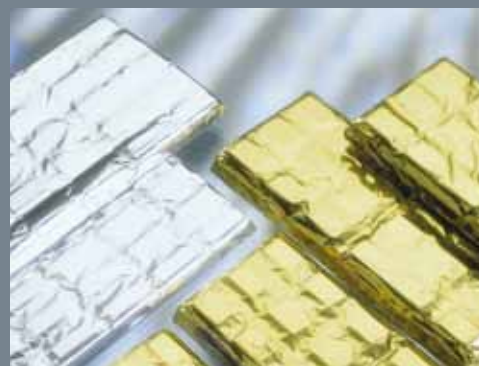

Gauge: 0.006 to 0.060 mm double rolled • Width: up to 2,000 mm  
Coil ID: max. 150 mm, on steel core • Coil OD: max. 1,000 mm.

### Packing

All coils are packed in wooden boxes or pallets, well secured for safe transit.

### Surface Finish

**SYMETAL** Converter Foil is produced with one side bright and the other side matt.
