

AFSEL

ELVAL  *Furukawa-Sky Aluminum Corp.*

**Rolled Products
for Heat Exchangers**

AFSEL S.A. is a joint venture between two leading aluminium manufacturers, ELVAL S.A. from Greece and Furukawa-Sky Aluminum Corp. from Japan. These two great joint forces created AFSEL, in order to produce high-end aluminium coils for the European automotive market.

AFSEL S.A. handles the promotion and commercial support of the new range of products, which are manufactured by ELVAL S.A. (production location is in Greece), which are flat rolled clad products of three aluminium alloys, achieving brazing properties at each layer, so that they can be used for the production of heat exchangers for automobiles.

Working Together... for a Great Future

ELVAL S.A. is the production base, with its highly qualified and specialized workforce, state-of-the-art manufacturing facilities and cutting-edge production technologies, while **Furukawa-Sky Aluminum Corp.** provides advanced technical knowhow from its long engagement in aluminium products for the automotive industry and a state-of-the-art research and development center.

What about...

ELVAL S.A. leads the largest group of companies engaged in aluminium activities in Greece with its primary objective to maintain a strong and consistent presence, among the leading flat rolled aluminium producers worldwide. The company has achieved this through sustained investments in research and development, constant improvement of its production infrastructure and the establishment of international partnerships.

Furukawa-Sky Aluminum Corp. is Japan's leading producer of aluminium products, working closely with customers and partners to develop aluminium's unlimited potential. The company offers advanced, diversified value, based on its wealth of expertise in every aspect of aluminium and maintains a stable supply of high quality products through its production facilities, which are amongst the largest in scale and most advanced in the world.
